Security Clearance

Secret Level Security Clearance Jul 2026
Enhanced Reliability Level Security Clearance March 2024

Education

University of Ottawa Ottawa, ON
Bachelor of Applied Science, Software Engineering *GPA: 3.7/4.0* Sept 2020 - Dec 2024

Work experience

Software Analyst May 2024 - Present
Elections Canada Ottawa, ON

- Developed **C#/.NET Core LINQ** REST APIs backed by SQL Server databases, enabling internal teams to securely access and consume operational data through reusable endpoints. Built and maintained scalable **ETL pipelines** using **Python**, and **SQL** to extract data from **Oracle** databases, transform it according to business requirements, and load it into MSSQL data warehouse
- Refactored legacy SQL code in MSSQL to follow modern **T-SQL standards**, optimizing database objects including stored procedures, views, and functions.
- Managed code changes and releases across **DEV**, **UAT**, and **PROD** environments using **Git/Azure DevOps**, including branching, pull requests, deployment validation, and production troubleshooting.

Web Publisher Oct 2024 - Dec 2024
Global Affairs Canada Ottawa, ON

- Updated and maintained over 30 different web pages on the intranet using **HTML** and **CSS**, ensuring clean, efficient, and accessible code following WCAG AA practices.
- Collaborated directly with clients to implement content updates under tight deadlines, demonstrating effective communication and teamwork.

Full Stack Developer September 2023 - April 2024
University of Ottawa Ottawa, ON

- Developed and maintained full-stack web applications using **Java, Spring Boot, Angular, TypeScript, jQuery, HTML, and CSS**, including an event management and registration platform supporting over **20,000 users**.
- Redesigned the University of Ottawa's emergency alert website with **Angular** and **Typescript**, introducing a modern, interactive UI. Used by over **20,000** students daily.
- Designed and implemented **REST APIs** to support backend application functionality using Java and Spring Boot
- Reduced **Java REST API** response times by shifting filtering and data processing to the database layer and developing optimized **SQL queries**, minimizing unnecessary application-layer processing and data transfer.
- Modernized frontend components using **Angular Material UI** and TypeScript to improve usability, and consistency across the application.
- Developed automated unit, integration, and end-to-end tests using **JUnit, Jasmine, and Cypress** to validate backend services, frontend functionality, and regression scenarios.

Cloud Developer Intern May 2023 - August 2023
Trend Micro Inc. Ottawa, ON

- Developed serverless monitoring workflows using **AWS Lambda, S3, and CloudWatch** to analyze **50,000+ artifacts per day** and support automated vulnerability scanning pipelines for high-volume cloud artifacts.
- Defined and maintained cloud infrastructure using **Golang**, **AWS CDK**, through **CloudFormation** to provision **50+ AWS resources** and improve repeatability of service deployments.

Full Stack Developer Intern January 2022 - April 2022
Applied Mind Inc. Ottawa, ON

- Automated event detection by integrating **Python**, **PostgreSQL**, and **GraphQL**, reducing manual detection time.
- Designed real-time dashboards in **Vue.js** for better monitoring and quicker validation of production events.
- Added dynamic updates to the graph, map, and notification components using **VUE** dynamic update feature and **GraphQL** subscriptions which improved UX

Full Stack Developer June 2019 - June 2021
Tech Under Twenty Oakville, ON

- Created and tested RESTful APIs using **.NET Core (C#)** for the member management system, improving stability and data validation accuracy.
- Designed responsive UI components in **Angular**, performing manual testing and debugging to improve user experience.

Projects

Hotel Room Booking System *React, Javascript, HTML, CSS* **https://hotel-booking.github.io**

- Utilized React, Bootstrap, and Material UI to style the website frontend for the hotel booking website
