Software Engineer | Android Developer | Cloud & Distributed Systems

Software Engineer with experience in Android (Kotlin), cloud infrastructure (AWS), and large-scale systems testing. Skilled in troubleshooting production systems, building developer tools, and collaborating with cross-functional stakeholders to deliver reliable software solutions. Fluent in English and Urdu.

Technical Skills

Programming Languages:	C++, C#, Python, Java, JavaScript, TypeScript, GoLang, SQL, HTML/CSS
Frameworks/Tools:	NUnit, Google Test, Cypress, Jenkins, AWS, Docker, Vue.js, React, Angular, Git
Testing Expertise:	QA Automation, Test Case Design, Agile Testing, Regression Testing, Defect Tracking

Work Experience

QA Software Developer September 2024 - Present
Kinaxis Inc. Ottawa, ON

- Conducted extensive **quality assurance testing** for the Maestro supply chain planning product, developing automated test cases using **C++ (Google Test)** and **C# (NUnit)** frameworks.
- Created and executed **functional test suites** to validate compatibility between modular and legacy systems, identifying critical mismatches using SQL-based data validation.
- Documented, analyzed, and reported software defects in collaboration with developers within an **Agile QA environment**.
- Integrated automated QA workflows into **Jenkins CI/CD pipelines**, enabling faster build validation and regression testing.
- Partnered with cross-functional teams to define testing requirements, build test cases from feature designs, and ensure adherence to SaaS release quality standards.

Full Stack Developer September 2023 - August 2024
University of Ottawa Ottawa, ON

- Improved the University emergency alert system using **Laravel** and **Drupal**, supporting **20,000+ daily users** and improving responsiveness of emergency notifications.
- Worked directly with university stakeholders to gather requirements, troubleshoot system issues, and deploy reliable web features.
- Implemented testing workflows using **Cypress**, **Jasmine**, and **JUnit** to validate backend and frontend functionality.
- Optimized SQL queries and backend APIs in Java, reducing data lookup times and improving platform performance.

Android Developer (Part-Time Contractor) Aug 2021 - Jan 2023
Desserts App Startup

- Developed Android application features using **Kotlin** and the **Android SDK**, integrating REST APIs to enable real-time application functionality.
- Implemented asynchronous data processing and optimized performance across multiple Android devices.
- Worked with product stakeholders to translate business requirements into mobile application features.
- Diagnosed and resolved mobile application issues to improve stability and user experience.

Cloud Developer Intern Sep 2022 - Dec 2022 & May 2023 - Aug 2023
Trend Micro Inc. Ottawa, ON

- Built automation for AWS-based testing environments using **GoLang**, **AWS Lambda**, and **Athena**, improving test data processing efficiency.
- Configured **CloudWatch** and **Splunk** alarms to proactively detect errors, reducing false test results and downtime.
- Developed and maintained automated integration tests for serverless pipelines to ensure stability of continuous releases.

Education

University of Ottawa Ottawa, ON
Bachelor of Applied Science, Software Engineering *GPA: 3.7/4.0* September 2020 - March 2025

Projects

Delta Dispenser (Delta Hacks) *Dart, Android, Firebase* devpost.com/delta-dispenser

- Built a mobile app for medication tracking using Flutter and Firebase; won **1st place at DSC McMaster Challenge** among 300+ participants.
