Software Development Engineer in Test (SDET) | QA Automation | Software Quality Engineering

Technical Skills

Programming Languages:	C++, C#, Python, Java, JavaScript, TypeScript, GoLang, SQL, HTML/CSS
Frameworks/Tools:	NUnit, Google Test, Cypress, Jenkins, AWS, Docker, Vue.js, React, Angular, Git
Testing Expertise:	QA Automation, Test Case Design, Agile Testing, Regression Testing, Defect Tracking

Work Experience

Frontend Developer May 2024 - Present
Elections Canada Ottawa, ON

- Built internal **data analytics dashboards** using **Power BI and Streamlit** to display database health, operational metrics, validation trends, and data quality issues for directorate and senior management.
- Built dashboards for cross team examination and customer review and ceo using React
- Built front-end website forms for internal team signing up for the data transformation
- Utilized react to creat dashboards for clients adding features and implementing data statistics
- Collaborated in an **Agile cross-functional** team with stakeholders to improve ETL data workflows, release quality, and production reliability.

Full Stack Web Developer September 2023 - May 2024
University of Ottawa Ottawa, ON

- Revamped the event registration and admin web pages utilizing **Angular**, and **Javascript** for maintainable, scalable styles, and reducing redundant code lines by 50
- Redesigned the University of Ottawa's emergency alert website with **HTML**, **SCSS**, and **PHP**, introducing a modern, interactive UI. Used by over **20,000** students daily. **website: ue.uottawa.ca/**
- Wrote 9 End to End tests using Cypress, and 25 unit tests using Jasmine for new APIs and features implemented on frontend
- Executed feature enhancements on a University of Ottawa main website using **Drupal**, significantly improving the digital experience for 50,000 + students.
- Enhanced the University's emergency alert website using **Laravel** and **Drupal**, improving accessibility and response speed for 20,000+ daily users.
- Designed and executed **unit and end-to-end tests** using **Jasmine**, **Cypress**, and **JUnit**, validating new frontend and backend features.
- Collaborated with engineering teams in an **Agile sprint cycle** to review test results, ensure feature reliability, and fix UI/API integration bugs.
- Optimized SQL queries and REST APIs in Java, achieving 15-second faster data lookups across the event system.

Cloud Developer Intern Sep 2022 - Dec 2022 & May 2023 - Aug 2023
Trend Micro Inc. Ottawa, ON

- Built automation for AWS-based testing environments using **GoLang**, **AWS Lambda**, and **Athena**, improving test data processing efficiency.
- Configured **CloudWatch** and **Splunk** alarms to proactively detect errors, reducing false test results and downtime.
- Developed and maintained automated integration tests for serverless pipelines to ensure stability of continuous releases.

Frontend Developer Intern January 2022 - April 2022
Applied Mind Inc. Ottawa, ON

- Automated event detection workflows by integrating **Python**, **PostgreSQL**, and **GraphQL**, reducing manual QA verification time.
- Designed real-time dashboards in **Vue.js** for better monitoring and quicker validation of production events.

Full Stack Web Developer June 2019 - June 2021
Tech Under Twenty Oakville, ON

- Created and tested RESTful APIs using **.NET Core (C#)** for the member management system, improving stability and data validation accuracy.
- Designed responsive UI components in **Angular**, performing manual testing and debugging to improve user experience.

Education

University of Ottawa Ottawa, ON
Bachelor of Applied Science, Software Engineering *GPA: 3.7/4.0* September 2020 - March 2025

Projects

Delta Dispenser (Delta Hacks) *Dart, Flutter, Firebase* devpost.com/delta-dispenser

- Built a mobile app for medication tracking using Flutter and Firebase; won **1st place at DSC McMaster Challenge** among 300+ participants.
