Security Clearance

Secret Level Security Clearance October 2024 - October 2034

Professional Summary

Software & Data Analyst with experience in **ETL pipelines, data analytics, and cloud-based systems**, specializing in **translating business requirements into scalable technology solutions**. Proven ability to deliver **data-driven insights, optimize processes, and support digital transformation initiatives** in fast-paced, stakeholder-driven environments.

Skills

Programming Languages:	C#, ASP .NET, Python, Java, JavaScript, Kotlin, SQL, HTML/CSS, PHP, Flutter, C++
Tools/Frameworks:	Power Platform, Power BI, AWS, Splunk, Flask, React, Docker, Git, Firebase, Linux
Business & Consulting:	Business Analysis, Requirements Gathering, Process Optimization, Data-Driven Decision

Work experience

Software & Database Analyst May 2024 - Present
Elections Canada Ottawa, ON

- Led the design and implementation of a **data validation and monitoring framework (Python, PySpark)** to identify data inconsistencies, improving data accuracy and supporting **data-driven decision-making for business stakeholders**
- Developed **Power BI** dashboards and executive-level reports to communicate database health, operational metrics, and data quality insights to senior management, enabling informed strategic decisions
- **Presented data insights and optimization strategies** to stakeholders, translating technical findings into actionable business recommendations to improve ETL workflows and system reliability
- Automated ETL validation workflows using **Power Automate**, reducing manual effort and improving efficiency through process optimization and workflow automation
- Coordinated version-controlled **database deployments** and release processes, ensuring alignment between technical delivery and business requirements across multiple environments
- Collaborated with cross-functional teams to **gather and define system requirements**, ensuring solutions aligned with organizational goals and operational needs
- Worked in a fast-paced, ambiguous environment, adapting to evolving requirements while delivering high-quality solutions under tight timelines for the digital transformation initiative
- Contributed to continuous improvement initiatives by identifying opportunities to enhance system performance, data quality, and operational efficiency

Software Developer Intern September 2023 - April 2024
University of Ottawa Ottawa, ON

- Supported development and maintenance of **Microsoft Power Platform applications**, including **Power Automate**, to enhance workflow automation, data processing, and operational efficiency.
- Developed **Power Platform solutions** including **Canvas Apps and Model-Driven Apps** integrated with **C# backend services** to support event management, user interactions, and data-driven workflows
- Redesigned the University of Ottawa's emergency alert website with **C# (.Net Core)** and **Angular**, introducing a modern, interactive UI. Used by over **20,000** students daily. website: ue.uottawa.ca/
- Optimized existing **C#** REST APIs by reducing **LINQ** query execution time for event data lookup by **30 %** and lines of code by **40 %**

Cloud Developer Intern May 2023 - August 2023
Trend Micro Inc. Ottawa, ON

- Utilized **AWS Lambda** to monitor client files, images and code uploaded to the cloud and scan for vulnerabilities using Anchore APIs and Grype
- Programmed robust error handling for **AWS Lambda** functions in GoLang using goroutines to ensure proper timeout and recovery, reducing data corruption and improving service reliability

Cloud Developer Intern September 2022 - December 2022
Trend Micro Inc. Ottawa, ON

- Developed a serverless automation solution using **AWS Lambda, S3, and Athena crawlers** to trigger metadata updates on data changes, significantly reducing manual intervention and operational overhead
- Configured **Splunk** and **AWS CloudWatch** alarms for proactive monitoring of test logs and crashes, enhancing system reliability and reporting.

Education

University of Ottawa Ottawa, ON
Bachelor of Applied Science, Software Engineering *GPA: 3.7/4.0* Sept 2020 - Dec 2024
